

Please keep xm radio as it is!!! This is so very important to so many people. My commute to work is an hour and a half to Northern Virginia (right outside of Washington, DC) where traffic gets very congested if there is a slight fender bender. The updates on XM are much more helpful than that of regular am/fm radio and more timely. This enables me to take another route rather than getting caught up in the congestion and adding to that mess. It also enables me to be on time for work which is extremely important to me.
